

# CARE & MAINTENANCE INSTRUCTIONS

These instructions apply to all Baelea DPL floors (Direct Pressure Laminate), including the **HydroPlus** floors.

## 1. PROTECT

Baelea DPL is an easy-care, wear-resistant floor with a long lifespan and a hygienic hard surface.

To protect your floor, we recommend the following actions :

- Place a suitable doormat at your entrance(s) to absorb dirt and/or moisture. Sand and dirt can have the effect of "sandpaper" and may cause premature wear and tear or scratches.
- Place felt pads under the legs of chairs and tables to avoid scratches.
- Equip other furniture and heavy objects with felt pads for safe moving.
- Clear plastic mats must be used under office chairs with wheels.

### Indoor temperature and relative air humidity

The Baelea DPL floor is produced from wood material that reacts on changes in the indoor climate.

The ideal indoor climate for a laminate floor is a relative humidity between 40 and 60 % and a temperature between 18 and 25 °C.

### Static electricity

Baelea DPL is a partially insulating floor covering. If the relative humidity in the room is kept at around RH 50 % or more, then this will reduce the floor's ability to develop static charges.

## 2. CLEAN

Baelea laminate floors are extremely easy to clean. In very little time and with a minimum of effort you can enjoy a clean and beautiful floor for many years.

### Dry cleaning methods

For daily cleaning, we recommend that you use a soft brush, vacuum cleaner or dry dust mop. Microfiber mops are ideal.

### Wet cleaning methods

When cleaning with water, a well wrung-out cloth and lukewarm water are recommended. Avoid using too much water.
